About us

Iris Colors Enterprise is one of the well-established paint manufacturing company. We are pleased to introduce ourselves as among the leading manufacturers and suppliers of Industrials paints. The main objective of our company is to carry on manufacturing paints of all kinds such as Hi-Gloss Enamel paint, Epoxy Paint, Quick Drying, Self Priming Paint, Varnishes, Bituminous Paint, Red oxide zinc chromate primer, Aluminum Paint, and Antic-Corrosive Primers. Our delivery services will always reach your expectations. Our brand is Fresco & Chota Jammu.

 - Quick drying paint
 - Epoxy paint & primer
 - Etch primer
 - Bituminous paint
 - Redoxide zinc chromate primer
 - Aluminum paint
 - Anti-corrosive paint
 - Polyurethane paint
 - Heat Resistant paint
 - Varnish
 - Acrylic paint
 - Thinner
- 
- A decorative geometric pattern at the bottom of the slide, consisting of a grid of triangles in various colors (blue, pink, orange, green, yellow) arranged in a stepped, architectural style.

Synthetic enamel paint & primer

Synthetic enamel paint is commonly used for surface finishing, providing weather protection. It is typically applied with synthetic primers on steel structures, machinery, containers, and other equipment.

Synthetic primers are used for corrosion protection on steel, zinc-coated surfaces, metals, and wood. They contain various binders and additives and are applied with synthetic topcoats or alone before material transport.

Quick Drying Paint

FRESCO Quick Drying Synthetic Paint is a high-quality, fast-drying alkyd-based paint, ideal for surfaces requiring excellent adhesion and quick drying. It is suitable for machinery, barrels, scaffolding, and both indoor and outdoor wood and metal finishes.

Epoxy paint & primer

Epoxy paints provide strong adhesion and resistance to acids, alkalis, and solvents on metals like cast iron, aluminum, and steel. They reduce flammability risks but are prone to chalking and yellowing outdoors due to UV exposure.

Epoxy-based metal primer offers excellent adhesion and superior rust protection for mild steel, providing a durable finish. It can be applied indoors and outdoors, and should be top-coated with enamel.

Etch Primer

Etch Primer improves adhesion and corrosion resistance by chemically etching into metal surfaces. It prevents rust, enhances paint adhesion, and is compatible with various topcoats. Suitable for steel, aluminum, and galvanized metals, it provides durable, long-lasting protection.

Bituminous paint [black Japan]

Bitumen paint is a weatherproof, corrosion-resistant coating with strong adhesive properties, used to create vapour-proof and protective layers.

Redoxide Zinc Chromate Primer

FRESCO Red Oxide Chromate Primer is a highly anticorrosive primer that forms a chromic layer on metal surfaces, providing excellent adhesion and corrosion protection. It can be easily applied by brushing or spraying.

Aluminum paint

FRESCO Aluminium Paint is a fast-drying paint with excellent adhesion, hardness, and heat resistance. It offers brilliant luster and durability, making it ideal for steel structures like railway wagons, bridges, transmission towers, chimneys, tanks, and fences.

Anti-corrosive primers

FRESCO Anti-Corrosive Primer Red offers excellent adhesion and superior corrosion resistance, making it ideal for metal surfaces. It can be easily applied by brushing or spraying to form a durable, cohesive coating.

Polyurethane Paint

Our Polyurethane Paint (PU) is a high-performance, two-component primer that provides superior adhesion and durability on metals, wood, fiberglass, and existing coatings. Ideal for industrial, automotive, marine, and architectural use, it offers excellent resistance to chemicals, abrasion, UV, moisture, and temperature changes, ensuring long-lasting protection in demanding environments.

Heat Resistant Paint

Heat Resistant Aluminium Paint protects metal surfaces from high temperatures (200°C, 400°C, 600°C), offering durability, heat reflection, and corrosion resistance. It's ideal for industrial, automotive, and residential use.

Varnish

Copal Varnish is a natural, high-gloss finish made from copal resin, providing durable protection for wood and metal. It resists moisture, UV, and alcohol, making it ideal for both indoor and outdoor use, while enhancing surfaces with a brilliant, resilient shine.

Acrylic

Acrylic is a solvent-based paint with excellent adhesion and sealing for a smooth base coat. Acrylic Finish Paint provides a durable, vibrant, weather-resistant finish for interior and exterior use. Acrylic Road Marking Paint offers high visibility, quick drying, and skid resistance for safe, long-lasting markings. All products are eco-friendly, low-odor, and easy to apply.

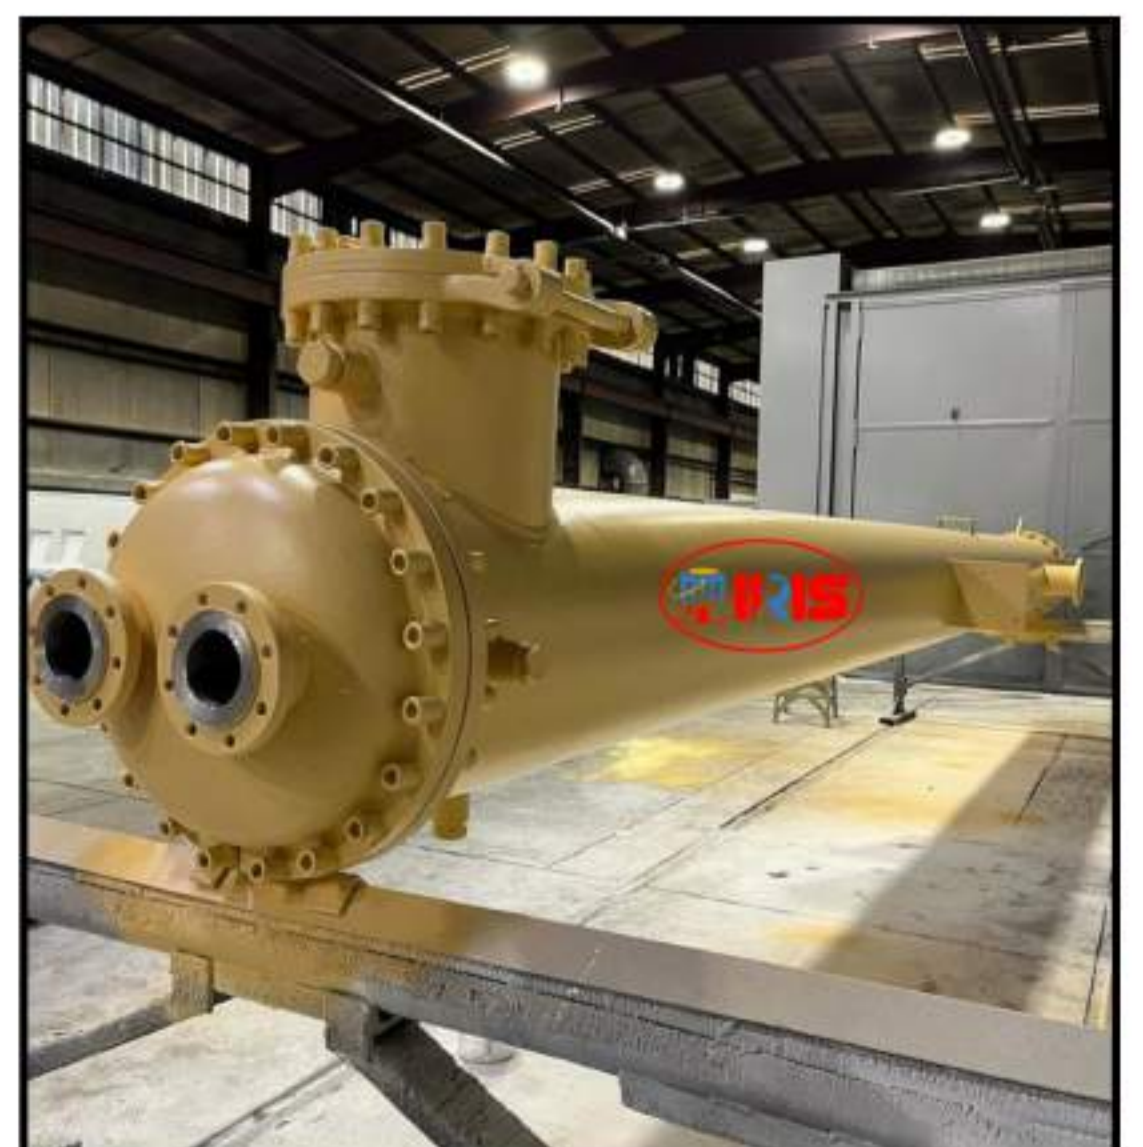

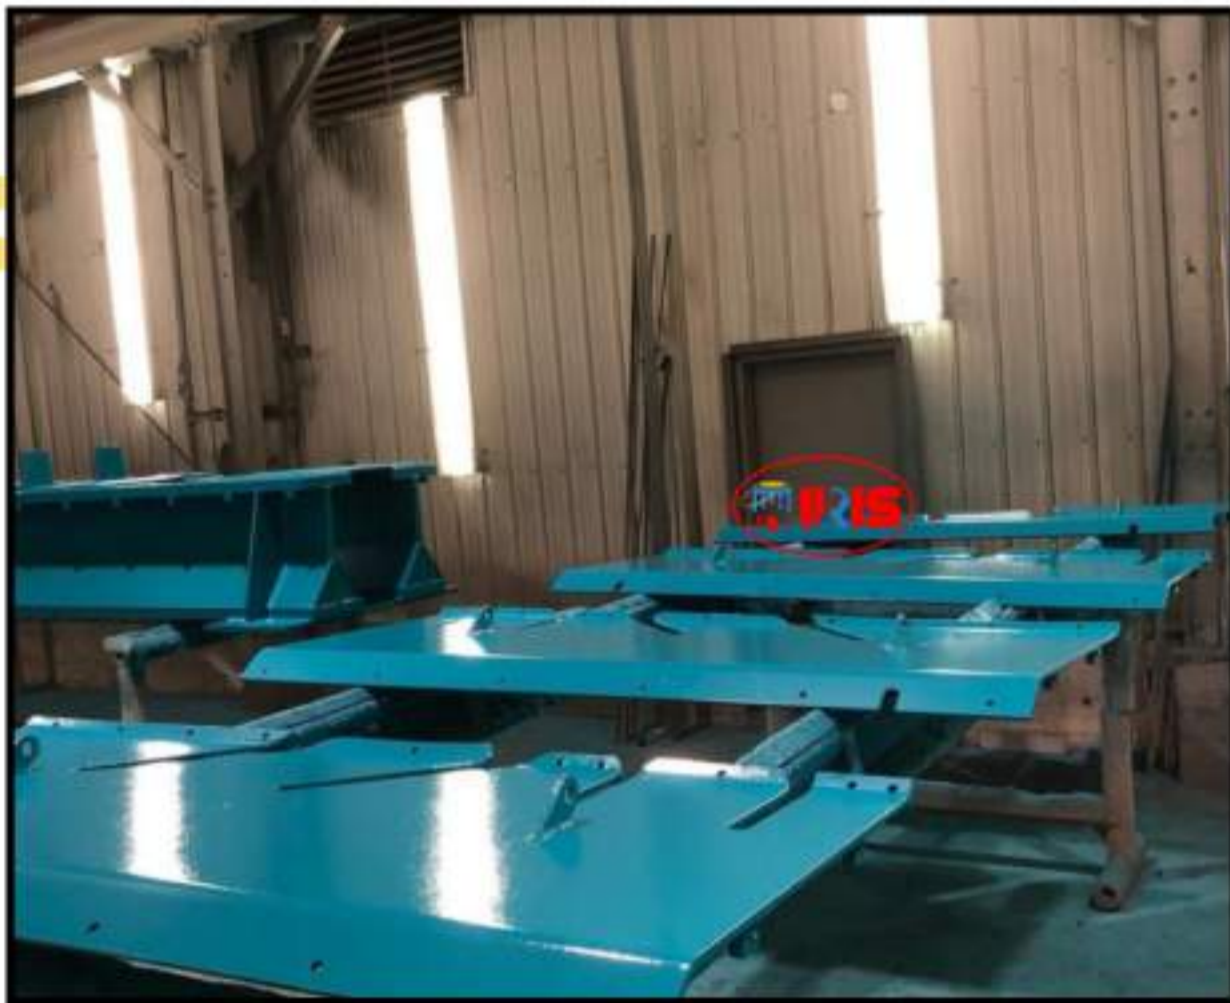

Thinner

Thinner is a solvent used to dilute paint or clean tools. It reduces viscosity and is made from chemicals like acetone or mineral spirits. Thinners are flammable and should be used in well-ventilated areas.

Our Creations

Office Address

Surme plaza building, Royal garden, Kausa, Mumbra, Thane,
Maharashtra-400612.

Factory Address

Shop 2, Survey no. 72/2B, behind Choudhary Kata,
Uttarshiv, Mumbra-Panvel road, Thane Maharashtra-400612

General manager - Mr.Sarfaraz Khan +919082267033

Sales manager - Mr.Malik Shadan +918104995312
